Bicycle Tires

THE NON-SKID for Safe Speeding

It had to come—a Goodyear Bicycle Tire, built like our famous Non-Skid Auto Tire,—a Non-Skid Bicycle Tire with a grip that makes speeding safe even on a slippery road

These diamond-shaped blocks of white tough I hese diamond-shaped blocks of white tough rubber have a gripping surface that no other I ire has equalled. I you can see it for yourself. The angles and edges prevent thipping and accidents— give the rider greater traction power on wet, and greaty streets. Here is confidence that makes wheeling a pleasure.

And the extra thickness of white rubber—the udest wearing rubber—gives longer wear and fewer punctures.

Look up the Goodyear dealer.

The Great Streets of the World

Are Paved with Wood Fibre

From the Post Office to the southern end of Manhattan Island, in New York City, this main street of the western metropolis is paved with wood. Prior to the introduction of "the silent pavement," as the newspapers called it, Broadway was unbearably noisy. The lower floors of the skyscrapers which front on this section of the street were rendered almost unavailable for business purposes in summer. When windows had to be kept open, the street noise drowned conversation and prevented the use of tele-

With the coming of wood block pavement all this was, suddenly changed. The street became one of the quietest in town.

The racket of traffic dwindled to a low undertone, and conversation could be conducted on the sidewalk with perfect ease and without rasing the voice. Property values were advanced and offices on the lower floors became desirable.

The pavement has been in place for some years and shows not the slightest sign of deterioration. The cars on Broadway run with great frequency, but the wood block pavement adjacent to the rails shows no damage from the vibration and the contour of the parement is perfect. Among New Yorkers wood block parement has become a great favorite, and property owners freuently petition for it when repaying of other streets is contem-

The great thoroughfares of London, Paris, Chicago, St. Louis, Philadelphia, etc., are paved with wood block. Progressive Canadian cities should adopt this type of parement also.
We are prepared to furnish it.

The Great Streets of the World Are Paved

with Wood Blocks

In Philadelphia, Market Street is the great central thoroughfure leading from the Broad Street Station to the River and the Camder Ferry. After the subway on this street was completed the morehants of Market Street banded together to obtain a clean type of pavement which would invite traffic to that street and would give such durability that the dirt and congestion caused by re-paving operations and repairs would be reduced to a minimum.

They formed a Committee and secured expert advice. Their co clusions were in lawor of wood block pavement and they inaugurated campaign before the city authorities and forced it through.

BLOCKS.

It was the first wood block payement to be laid in Philadelphia and there was intense public interest in it. When it was done the merchants of Market street bound their work unore than justified. Vehicials traffic would go out of list way to use the wood block payement in preference would go out of its way to use the wood nock parement in preserved to stone or asphalt used on parallel streets. The parement did not pro-duce any dest and the air was unusually clear. Street noise was reduced to a low and not impleasant hum. The parement was clean and handto a low and not unpleasant aum. The parenter was treat and was some and Market Street became "the show street" of the city. The merchants found that it increased their trade, and land owners found that it increased their land values. Since the adoption of wood block parenter on Narket Street there has been a persistent demand for its extension to other thoroughfares.

ORDINARY NON-SKID TO-DAY

Get To-morrow's Use

From To-day's Tires

Features that apply not only the day you buy the tires-but six months after-are the only features you ought to pay for.

With ordinary non-skids the tread is bound to wear smooth sooner or later—usually sooner—because there is no size to the non-skidding surface.

It is different with Dunlop Traction Tread. When you buy this tire you get the biggest anti-skidding surface in the world. The wear on Dunlop Traction Tread corrugations is but the slightest, and it's no greater in the centre of the tread than on the sides.

Thus with Dunlop Traction Tread you get the benefit of the traction grip all the way down with the wear.

The Great Streets of London Are Paved with Wood Blocks

In all the great capitols of the world, wood block pavements are considered best and are for the principal thoroughfares and boulevards.

Wood block pavement is chosen because it is more durable even than stone. Its easy tion always attracts traffic from other pavements. It is noiseless, a vital matter for public when traffic is heavy. It creates no dust, because of its fibrous nature.

The above photograph shows wood block pavement in use on the Strand, London. This susservest earlies traffic of a density unknown on this continent. For such traffic asplialt d not last a month, while grantic would be unbearably noisy.

We are prepared to self creasofed most blocks to progressive Canadian vities

The Fuel Problem

The locomotive fireman feeds his engine the sort of fuel that produces the greatest power and speed.

If you want to develop your power and speed, your food must do two things; (1) replace the used-op percept; (2) replace.

Energy is used up 5 ½ times faster than the tissues. So the perfect food fuel for you supplies energy and tissue at the ratio of 5½ to 1.

Exquisite Spring Apparel

Millinery of Distinction

This Spring finds us with one of the best and smartest stocks of Tailored and Dress Hats ever shown in Belleville. Not only have we a splendid showing of exclusive importèd shapes, but a large number of beautiful creations from our own workrooms. Vivid colorings predominate more than ever before, the new Bulgarian shades are quite popular, and others that stand most promi-nent are Nell Rose, Copenhagen, Coque-de-Roche, Canary Yellow, Patty Green and Purple. We have a large number new shapes, just arrived, they are the Montrose, Adele, Theatre, Batavia, Spring Maid, Clarissa, Spring Maid, Clarissa, Savoy, Monaco and Ben-ton, etc.

Such beauty combined with low prices you will seldom find.

Smart Spring Suits

Every new style, color and fabric that fashion has decreed for the spring season is arrayed in our Suit Department. You have but to come and examine our wonderful display and if we cannot show you what you not show you what you had your mind set upon you will not find it in Belleville. Some of the the new shades are Navy. Copenhagen, Tan, Taupe. Corn Flower, Elephant Grey, Oxford and Pearl Grey oxford and Pearl Grey and Silver. The new fabrics such as Whipcords, Serges, Bedford Cords, Ratines and Worsteds are all shown here. Mostly strictly Worsteds are all shown here. Mostly strictly plain tailored, some elegantly yet neatly trimmed. In fact our showing embraces all the style tendencies of the season. The prices are very moderate, ranging from

From To-day's Tires

Features that apply not only the day you buy the tires-but six months after-are the only features you ought to pay for

With ordinary non-skids the tread is bound to wear smooth sooner or later—usually sooner—because there is no size to the non-skidding surface.

It is different with Dunlop Traction Tread. When you buy this tire you get the biggest anti-skidding surface in the world. The wear on Dunlop Traction Tread corrugations is but the slightest, and it's no greater in the centre of the tread than on the sides.

Thus with Dunlop Traction Tread you get the benefit of the traction grip all the way down with the wear.

Therefore, you are still getting what you can get from no other tire—what you paid for in the first place. It isn't sufficient that you look ahead when driving your car. Look ahead when buying your

brain each day. Why doesn't it all disappear and leave an empty-skull in, say a mouth of brain work? Because the man rebuilds each

brain fac and nervous prostration result sure If he builds back a little more each day, the brain grows stronger and more capable. That also is knire. Where does man get the material to rebuild his brain? Let from air, aky or the ice of the Aretic sen? When you come to think about it, the rebuilding material must be in the tools and drink.

Are the brain rebuilding materials found all food? In a good variety, but not in table properties in all

To illustrate: we know homes are made largely of line and magnesia taken from food; therefore to make healthy bone structure we must have food containing three things. We would hardly feed only sugar and fat to make healthy bones structure in a growing child.

If we desired to keep brain strong and healthy we would use food known to contain the things Nature uses for the purpose.

True, Nature provides these elements in a variety of edible things. We submit the fol-lowing facts for those who cure to know some-thing definite on the subject:

Analysis of brain by an unquestionable au-thority, Geologau, shows of Mineral Salts, Phosphoric Acid and Potash combined (Phosphoric of Potash) 2.01 per cent. of the total, 5.33 of all mineral Salts.

Beaunis, another authority, shows "Phos-phoric Acid combined" and Potash 73.44 per cent, from a total of 101.07,

Considerable more than one half of Phosphate of Potash.

one but of all the universal salts in the food. Dr. Geo. W. Carry, an authority on the constituent elements of the body, says; "The grey matter of the barin is controlled entirely grey matter of the barin is controlled entirely (Phosphates of Fortabl). This salt unites with allowers and by the addition of suyen create-nerse fluid or the gray matter of the berian controlled or the gray matter of the berian (or course, there is a trive of other-wards and controlled or the gray matter of the barins salms Phosphate is the chief factor and has the power within itself to attered, by its own has of affinity, all things needed to manufacture the chief of flier.

Further on he says: "The beginning an end of the matter is to supply the lacking prin-ciple, and in molecular form, exactly as No ture furnishes it in regetables, fruits an grain. To supply deficincies—this is the oul law of cure."

tain it, you have brain fag because its daily loss is not supplied.

A peaceful and evenly poised mind is sary to good digestion.

Worry, anxiety, fenr, bate, etc., etc. alim, the digestire juice of the month, and also interfere with the flow of Pty-alim, the digestire juice of the month, and also interfere with the flow of the digestive juices of stomach and pancreas.

Brain is made of Phosphate of Potash as the principal Mineral Salt, added to albumen

Grape-Nuts contain that element as more than one-half of all its mineral salts. We must remember that nearly 95% of the brain is remember that nearly 95% of the brain is composed of water and alleumen, but the little worker Phosphate of Potsah must be present in order to blend the more bulky materials into uscable forms.

So with Grape-Nuts. The Phosphale of Potash is more than one half of all the mineral salts, but the total volume of those elements is exercisingly small as compared with the greater built of other food elements contained in Grape-Nuts.

We should also remember that this small ingredient should not be put into the food in the form it night eroms from a chemist, be-cause man cannot produce these echements in as digestible a form as old Mother Nature, when she puts them in the wheat and burjey from which Grape-Note is made.

A healthy brain is important, if one would "do things" in this world.

A man who success at "Mind" success at the best and least understood part of himself.

That part which some folks believe links us

Mind asks for a healthy brain upon which to act, and Nature has defined a way to make a healthy brain and renew it day by day as it is used up from work of the previous day.

Nature's way to rebuild is by 'the use food which supplies the things required. By rebuilding material is certainly found in year natural and nerfect form in

THE "CLOSURE" ITS HISTORY-MORE MISREPRESENTATION

justification of unparliamentary conduct. ide, it is claimed that the closure is a Tory device to "gag free rech." How far in this true?

A Liberal member of the House of Commons declared tha A Liberal member of the House of Commons declared that "Mc fladdroor was drive to adopt the closure, in 1889, and upit in for a long while and did not get back to it again until 1889." In reply to this statement, the facts are that in fingland the initiative for years was vested in the Speaker, and Mr. Gladdroor was powerloss to set flowing sping. But when the rules were numeded from 1897, on, what fast the result? A list of the times that closure has been invoked since that time year by zero in the British House will show that the hon, member gave the House to understand that the closure was a Toy de Ces, and that Mr. Gladstoore exercit of his turned in singest from It, shaka.Liberalism became disguested with it also, and that it has been the Tories who put it indo execution Since. What do the returns brought down to the English House of Commons show? In .1888 closure was applied twenty-eight times and in .1889 forty-seven times, and was applied continuously during the years 1902 and 1905. It will be reimembered that there was a Tory government in power in Eng-

This is the record of the two parties in Ifgaland as shown by an official report hid before Parliament in English. Yet in the face of these facts the Opposition in Parliament, and the leading press of that party unblushingly declare that closure is a "Tory device to gog and prevent freedom of discussion by Libertals." It was of power, loss of patronage and loss of apportunities for graft has redered the prevent Opposition little less , than political manifes whose ravings will have filted erely upon the public mine, people and being so ignorant as the Opposition their they are. HOW TO TELL IF YOUR HAIR IS

Men who demand that just right appearance wear the won Gal last. The authentic style, perfect workmankin and clean-cut design of these hats give that air of refinement so necessary to the correctly dreamed man. If it's a question with you of real wearing worth, of lasting satisfaction, a von Gal made is the logical purchase.

A von Gal style in the new offerings will catch your eye. At the price they cannot be excelled in workmanship, material and finish. See our wide range for spring.

A BOOMERANG

The Hon, Mr. Lemieux, Postmaster-General in the Laurier Gov

The Ion, Mr. Lemietr, Postmuster-General in the Lauter Gro-ermene; has, ince the change of Government; given eithers of having what it stemed, Pelleiter, the present Postmaster-General 'on the brain,' for scarcey's a day passes that the House of Commons meets that he does hot put quesions of that trifling, and frivolous character, which, when answers are given, often prove boomerages. Another M.P., Mr. Rainville, has followed in the wake of Mr. Le-miens, and others of the Opposition, and commenced seeking informa-ation, through asking questions, which, when answered, let a futte-tuder the time of the Ber Postmaster-General. Here are the questions and answers, a careful reading of which will dischoe how the money of the country is utilized just on the eve of an efection, and how friends are "graduest" when election frauds are required, though there may not have been any such use made of the money pask, just on the eve of a general election, for the one-handed and ter thessand beese portassed. ten thousand boxes purchased.

Mr. Rainville asked:

Mrs. Rainville asked;
 When and how were the hundred and ten thousand boxes for cural mail paid for, which were purchased by the preceding financial with tender?
 Was there in 1911 a greater number of boxes purchased than the required?

Mr. Pelletier answered:

What do these facts show? That 100,000 boxes were purachas Id up to the time the question was answered, only 18,86 in the bear, only 18,154 in the bear, only 18,154 in the bear, only 18,154 in the red, leaving 81,154 still in store; and that between January 28th, only, and September 20th, 19,17 Stogoo, but deep paid on account. Course it would be improper even to instantate that any payments ree made except for fosces purchased and delivered. It is also shown at in settling the balance of the faccount the present Posmaster-Genreduced the contract price, which the late Postmaster-General agreed to pay from \$150,000 to \$135,000.

A few more questions had better be asked and more light may be d as to how and when public money is spent.

Wood Blocks in Washington

The new Union' Station in Washington, D.C., ranks with the great government buildings as one of the finest specimens of monuneratial architecture in the United States. No expense has been spared to make it aplended and fitting entrance to this beautiful Capitol.

The parenent chosen for all the deriveways and approaches was rood block. These modern blocks, creesoted to prevent densely, and laid with the grain evertical on a smooth foundation of concrete, make an ideal parenent in this kind of attuation.

ment in this kind of situation.

In durability, this parement exceeds even granite book, and is therefore shouldantly able to withstand conventrated traffic the quirtest of all parements. The contusion and uproor characteristic of most railroad stations is entirely missing here. A traffic the station upon driven ways that are quiet, in an attention of the station upon driven ways that are quiet, in an attention of order and comfort.

The parement is smooth and cleanly, and hence anite the pe-destrians who setter from the clean and the setter is a six of the setter is

The Toronto Globe in its attempt to justify the conduct and the rings of the Opposition in Parliament, purports to quite Rule 17, a as usual, disboneatly omist that portion of the rule which is of the sot importance. It, quotes ther lute as followay:—
"When two or more members rise to speak Mr. Speaker calls on the member who first rose in his place, but a motion may be made at any member who has risen be now heard," or do now speak."
"When two or members rise to speak Mr. Speaker calls upon the member who first rose in his place; but a motion may be made that the man and the speak of the member of the speak of the speaker calls upon the member who first rose in his place; but a motion may be made that the half has farther than the speak of the speaker calls upon the member who first rose in his place; but a motion may be made that the half has farther than the Globe felt out the latter part of the rule, sich gives the power to the Speaker to atop discussion, and put the estion to vote.

uestion to vote.

Had it not been for the words "which motion shall be forthwith
ut without debate," Sir Wilfrid could have proceeded with the destee and moved his amendment, but the words "introduced by the
poposition leader himself seven years ago proved his own undoing. If
withful Laurier had left the rule as it was up to 1906, Mr. Borden Six Wiffid Laurier had left the rule as it was up to 1996, Mr. Borden would now have experienced much greater difficulty in cubing the blockers, in silencing the obstructionists, and in making progress with the country's business. Meantime The Globe is guilty of deviousness when it seeks to create the impression that the rule as it mow stands has been in operation ever since Confederation. What can be the object of mistattements which are so easily disproved? The Opposition press has teemed with them for a year past, and especially since the opening of the naval debate. The Globe has been probably the worst offender. Honest men will ask themselves why it should be necessary, even when dealing with party political questions, to mislead the reader by Italifying facts.

NON-SKID

Get To-morrow's Use From To-day's Tires

Features that apply not only the day you buy the tires—but six months after—are the only features you ought to pay for.

With ordinary non-skids the tread is bound to wear smooth sooner or later-usually sooner-because there is no size to the non-skidding surface.

It is different with Dunlop Traction Tread. When you buy this tire you get the biggest anti-skidding surface in the world. The wear on Dunlop Traction Tread corrugations is but the slightest, and it's no greater in the centre of the tread than on the sides.

Thus with Dunlop Traction Tread you get the benefit of the traction grip all the way down with the wear. Therefore, you are still getting what you can get from no other tire—what you paid for in the first place. It isn't

sufficient that you look ahead when driving anti-skid tires.

THE GLOBE IN ECSTASY

The Toronto Globe has a scandal, or pretends it has, hence it is reveiling in delight. On the first page of its issue of the 24th inst., it announces, apparently in great give and much satisfaction, certain charges against Messrs. Whitney and Hanna, Premier and Provincial monitors, apparently in given to be a proposed from the proposed f

some of the tetters being hait an inch long, and are as follows:

"Charges against Premier Whitings and Bino. Mr. Hanna.—Alleged Corrupt Practices by Government Leaders."

"Charged by Mr. Proudion with Receiving Money Illegally, Manipulating Granting of Coal Tenders and Acting Irregularly in Purchaser." "Sensational Incident in the Legislature on the Eve of Prorogation Scale and a sense of the Canadian Metropolities of the Cana

What are they? It appears that a firm by the name of Taylor Nhat are they? It appears that a firm by the name of laylor, Scott & Co., of Toronto, had a Central Prison contract with the Go-ernment, which contract the Government found necessary to cancel, on account of certain changes having been made in the management of prisons, by which the contractors allege they were losers to the extent of \$50,000, which claim the Government declined to recognize, but realizing the fact that the annulling of the contract had caused the firm eerlain loss, granted a fiat to test the claim in court, which afterwards was referred to an expert accountant to investigate and report upon, which he did, showing a loss to the firm slightly in excess of \$20,000, instead of \$50,000, as claimed by the firm. The crime with which the Premier and the Provincial Secretary is

charged by Mr. Proudfoot, for such it is, if true, is that before the firm could secure a flat to test its claim of \$50,000 in court, Taylor had to contribute \$500 to the Ontario election fund, and that that sum was paid to Mr. Hanna, after which the fiat was granted, implying that had not the \$500 been subscribed, the fiat would not have been granted.

ont the 8500 been subscribed, the flat would not have been granted.
After these incurdoes had been indulged in, both in the Public Accounts Committee and in the Legislature, Mr. Whitney mude a foll and
frankfratment of what had taken place bayers placed, Mr. Hanna' and Taylor, declaring that if any mishake: oliba-Legislature, would
prefer a specific, definite charge of midoling he would keep the Legislature in session until the whole case could be fully and theroughly investigated, upon which premise. Mr. Presuffort, no doubt with the ap-

Important Announcement

A Carload of Japanese "Sea Grass" Furniture has come to hand and you will have to act quickly if you want to be one of the lucky purchasers,

> "HE Japanese "Sea Grass" Furniture is springing into prominence more every year, and has now practically become a necessity in place of a luxury.

> For the lawn, porchway, garden or summer cottage, there is no kind of furniture moredurable, more appropriate or more artistic, than Japanese Sea Grass Furniture. It blends in perfect harmony with the natural surroundings, lending its own natural artistic lines to other features of your furnishings.

> The sea grass is harvested with as much care and painstaking as our own present day crop harvesting. It grows principally on the shoals so numerous around Japan, and was practically unknown until a few years ago, when the Japanese (who so well know how to do this class of work) discovered accidently, that this sea grass, that had been growing, and rotting away for ages, had all the qualities that go to make strong, durable and subtile

> Japanese Sea Grass Furniture is exceedingly well made, the chairs and rockers are perfect imitations of the higher priced wood furniture. A more comfortable chair or rocker could not be wished. They are meant in every way for rest. Just what you need after a hard day's work, or after an afternoon's shopping. You would be forced to think the chair was made to your order, when you find the ease and comfort derived from them,

Important Announcement

A Carload of Japanese "Sea Grass" Furniture has come to hand and you will have to act quickly if you want to be one of the lucky purchasers.

> "HE Japanese "Sea Grass" Furniture is springing into prominence more every year, and has now practically become a necessity in place of a luxury.

> For the lawn, porchway, garden or sum-mer cottage, there is no kind of furniture more durable, more appropriate or more artistic, than Japanese Sea Grass Furniture. It blends in perfect harmony with the natural surroundings, lending its own natural artistic lines to other features of your furnishings.

The sea grass is harvested with as much care and painstaking as our own present day crop harvesting. It grows principally on the shoals so numerous around Japan, and was practically unknown until a few years ago, when the Japanese (who so well know how to do this class of work) discovered accidently, that this sea grass, that had been growing, and rotting away for ages, had all the qualities that go to make strong, durable and subtile

Japanese Sea Grass Furniture is exceedingly well made, the chairs and rockers are perfect imitations of the higher priced wood furniture, A more comfortable chair or rocker could not be wished. They are meant in every way for rest. Just what you need after a hard day's work, or after an afternoon's shopping, You would be forced to think the chair was made to your order, when you find the ease and comfort derived from them,

Included in this display are large and small Chairs, Rockers, Settees, Tables, Work Baskets and Magazine holders, and each piece has a price ticket attached that makes it easy

Large Chairs \$5.00 to \$8.50 Children's Chairs and Rockers \$2.00 to \$2.90 Settees \$10.00 Tables \$7.50 to \$8.50 Work Baskets \$1 50 to \$4.50

FIGHTING FARMERS' BILLS

One of the loudest boasts indulged in by Liberals has always been hat the Liberal was the farmer's Jriend. Liberan have ever insisted hat only from Liberals could the farmers of Canada look for fair treatment. Events in the House of Commons during the past two sessions we shown this boast to be as empty and insincere as any of the other busand and one professions that have been made and repudiated by

The objections raised are as usual prefaced by expressions of good-will to the farmer. These expressions count for fittle when the means of helping the farmer are withheld or obstructed. Liberals in the House size that the ten millions for agricultural education should not be apprehiated, in one bill, in other words, that there should be appermancely in the new system, and that the agricultural industry should be put at the nercy of such factious opposition as may arise from year to year. The objection to the Government's proposal is so far-fetched, as to ill contest it pread lassi of Liberal houstligy. The Liberals don't want the farmer to enjoy the benefits of the Government policy to the full extent excreded under the bill. ded under the bill.

i. The Highways Bill is attacked on the ground that, as seen by the Opposition, it is capable of being turned to political account by the Government, that there may be discrimination as between province a play province. This objection is raised despite the plain fact that the Bill's of province is not a configure of some anong the provinces on a basis of population and with the co-operation of the provincial governments. Here again the real position of the liberals is revically. They don't want the farmers of Canada to enjoy the enormous benefits to be derived from the construction and maintenance, of good highways. MASTER HOW MUCH OF THE DA CANA THAT ROAD MEANS

WHEN we commenced using the phrase "Master of the Road" in our reference to Dunlop Traction Tread Tires we never expected we would get such an overwhelming testimony in support of our contention. We believed we were scientifically right in the construction of the tire—and that the materials we would use and the workmanship we would put on these materials—would finish up an excellent job.

Now comes a triumph never before achieved by any tire. You can no more compare the "Across the Continent" trips in the States to the Halling to the Continent trips in the States to the Halling the Continent trips in the States to the Halling with crossing an inland lake in the same craft. In the States it is now just a question of beating the other fellow's time. Road markers and road makers have made it companituely easy for the pathforder. In Canada, it is like sending a man through a widerness to send him over what are called roads in Northern Ontario and the Canadian West.

If any other tire maker tries to convince you there is nothing in a "Canadian-Across-the-Continent" triumph ask him how it is he remembers so well that Dunlop Traction Treads were the first tires to do it.
